Ramya Krishnaganth's Biography

- Ramya Krishnaganth is the Founder and Manager Partner of Uvid Consulting, an EPM service provider that specializes in creating value through Finance Process reengineering and Digital Transformation. She has helped various companies ranging from large enterprises with complex process and systems to fast paced startups in their successful EPM journey.
- Ramya has earned her MBA from the Wharton School, the University of Pennsylvania in the USA and CPA & Cost Accounting degrees from India.

Learning Objectives

1. Recognize when and how to start your finance transformation journey.
2. Describe the benefits of accelerating planning, forecasting and reporting through digitalization.
3. Apply a roadmap to help you create your own transformation plan.

Agenda

1. Introduction - Defining Financial Transformation
2. Mature Finance Function
 - Automation
 - Collaboration
 - Transformation
3. Key takeaways

FP&A

TRANSFORMATION

ROADMAP

Best practices for planning excellence

Poll Question 1:

What is FP&A transformation to you?

- a. A best practice
- b. Utilizing the capabilities of technology that is within reach
- c. Working faster, moving away from Excel
- d. Enhancing business processes
- e. A fancy buzzword

Poll Question 1 Results: (Placeholder)

A red rounded square containing a large, semi-transparent red 'X' that covers the entire area. The text is centered within the 'X'.

**A FANCY BUZZWORD
ABOUT WORKING FASTER
A BEST PRACTICE
MOVING AWAY FROM EXCEL**

A green rounded square containing a large, semi-transparent green arrow pointing to the right. The text is centered within the arrow.

**CAPABILITIES OF
TECHNOLOGIES THAT ARE
WITHIN REACH.
HOW TO ENHANCE BUSINESS
PROCESSES UTILIZING THE
LATEST TECHNOLOGY.**

Financial Transformation

Poll Question 2:

How would you characterize your finance function in terms of people, processes and technology?

- a. We operate 100% with all necessary skills, well-designed and completely automated processes
- b. On the path to a mature finance function, largely meeting current business needs, but rely on too many manual and ad-hoc processes
- c. Barely staying one step ahead – every month presents a challenge

Poll Question 2 Results: (Placeholder)

The Goal of Finance Transformation

— *Developing a Mature Finance Function*

What is a mature Finance Function?

- Works from a single and undisputed set of financial and operating metrics, to drive strategic conversations across all levels of the Company.

The Goal of Finance Transformation

— *Developing a Mature Finance Function*

What is the architecture of a mature Finance Function?

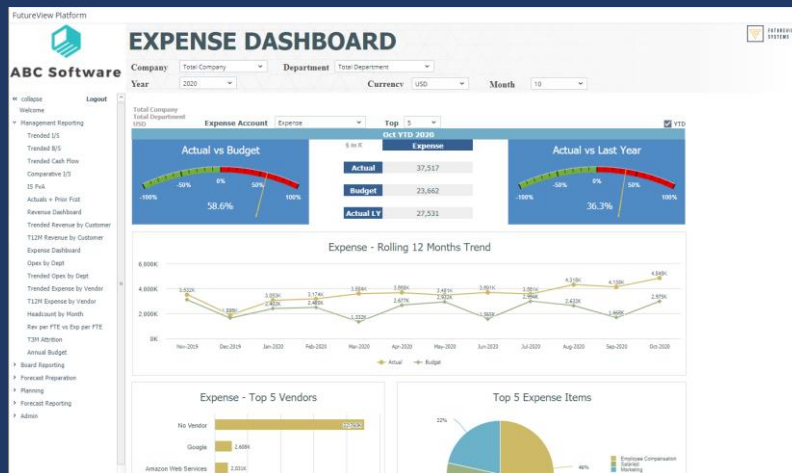

- Proper synchronization between Accounting and FP&A

The Goal of Finance Transformation

— *Developing a Mature Finance Function*

Automate routine tasks to
free up capacity for impactful
and ad-hoc analysis

The Goal of Finance Transformation

— *Developing a Mature Finance Function*

Understand the importance of transforming early

- ACT now, not later (present value)

The Goal of Finance Transformation

— *Developing a Mature Finance Function*

Effective Finance Transformations
lead to better business outcomes

Journey to Digitalization

Think Big. Start Simple. Scale Quickly.

Automate

Automate Planning, Forecasting & Reporting

Get your spreadsheet chaos and outdated systems under control & increase efficiency

What

Collaborate

Collaborate Across the Business

Eliminate siloes & enable agile performance management

Why

Transform

Transform Planning to Create New Value

Respond faster & augment decision-making

How

Journey to Digitalization

Think Big. Start Simple. Scale Quickly.

Automate

Automate Planning, Forecasting & Reporting

Get your spreadsheet chaos and outdated systems
under control & increase efficiency

What

Poll Question 3:

Which of the following is the **major** roadblock in achieving the desired FP&A cycle time in your organization?

- a. Getting data from multiple systems
- b. Integrating Forecast inputs from different stakeholders
- c. Running scenario analysis for different business situations
- d. Distribution of results & analysis for timely decisions

Poll Question 3 Results: (Placeholder)

Automation

Automation is fundamental to FP&A Transformation!

Automation should focus on -

- Consistency – FP&A Source of truth
- Reliability –Forecast accuracy & compliance
- Speed – Shorter Forecast cycle
- Faster Action – Quick outcomes for changing business scenarios
- Platform – Foundation for collaboration and transformation

Journey to Digitalization

Think Big. Start Simple. Scale Quickly.

Collaborate

Collaborate Across the Business

Eliminate siloes & enable agile performance
management

Why

“ The only way for finance to manage business performance is by **extending beyond the finance silo** and **incorporating key non-financial data** in FP&A and other financial analytic processes.

This will give finance the opportunity to **become a more valued strategic advisor** to the management team and line of business leaders.”

Gartner: Best Practices for Improving Financial Planning and Analysis Systems and Processes

Published: 20 March 2018

Removing Silos Recommended by Gartner

Poll Question 4:

Which of the following best describes your budgeting and forecasting process?

- a. Largely a finance exercise, where finance creates the inputs and visibility of the budget and forecasts to department heads, who lack ongoing visibility into the entire output.
- b. Finance receives some inputs from department heads, but finance largely owns the inputs of the budget and forecasts, and department heads lack ongoing visibility.
- c. Finance works directly with departments heads to complete budgets and forecasts, complete collaboration with inputs and visibility into the outputs.

Poll Question 4 Results: (Placeholder)

Collaboration

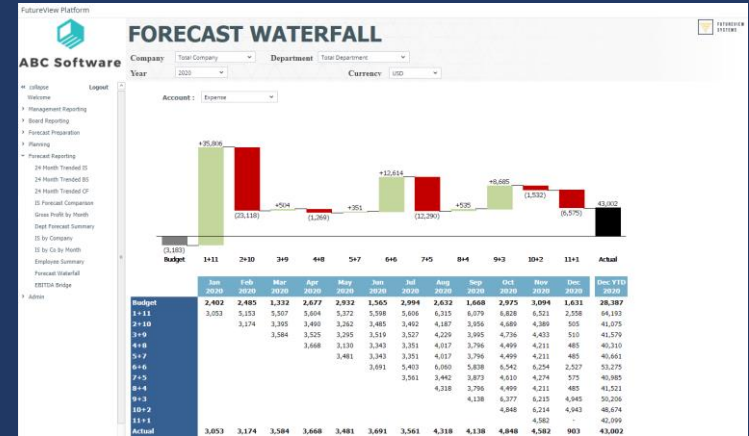

Finance is ultimately about enabling companies to make informed choices that consider all perspectives

- Department heads and budget owners working in tandem
- Finance maintains version control over the data

Collaboration

- The Accountability-based forecasting approach
 - 1+11, 2+11... Actual vs. Budget robust variance analyses is critical
- Implementing efficient Budgeting and Forecasting Processes are critical

Journey to Digitalization

Think Big. Start Simple. Scale Quickly.

Transform Planning to Create New Value
Respond faster & augment decision-making

How

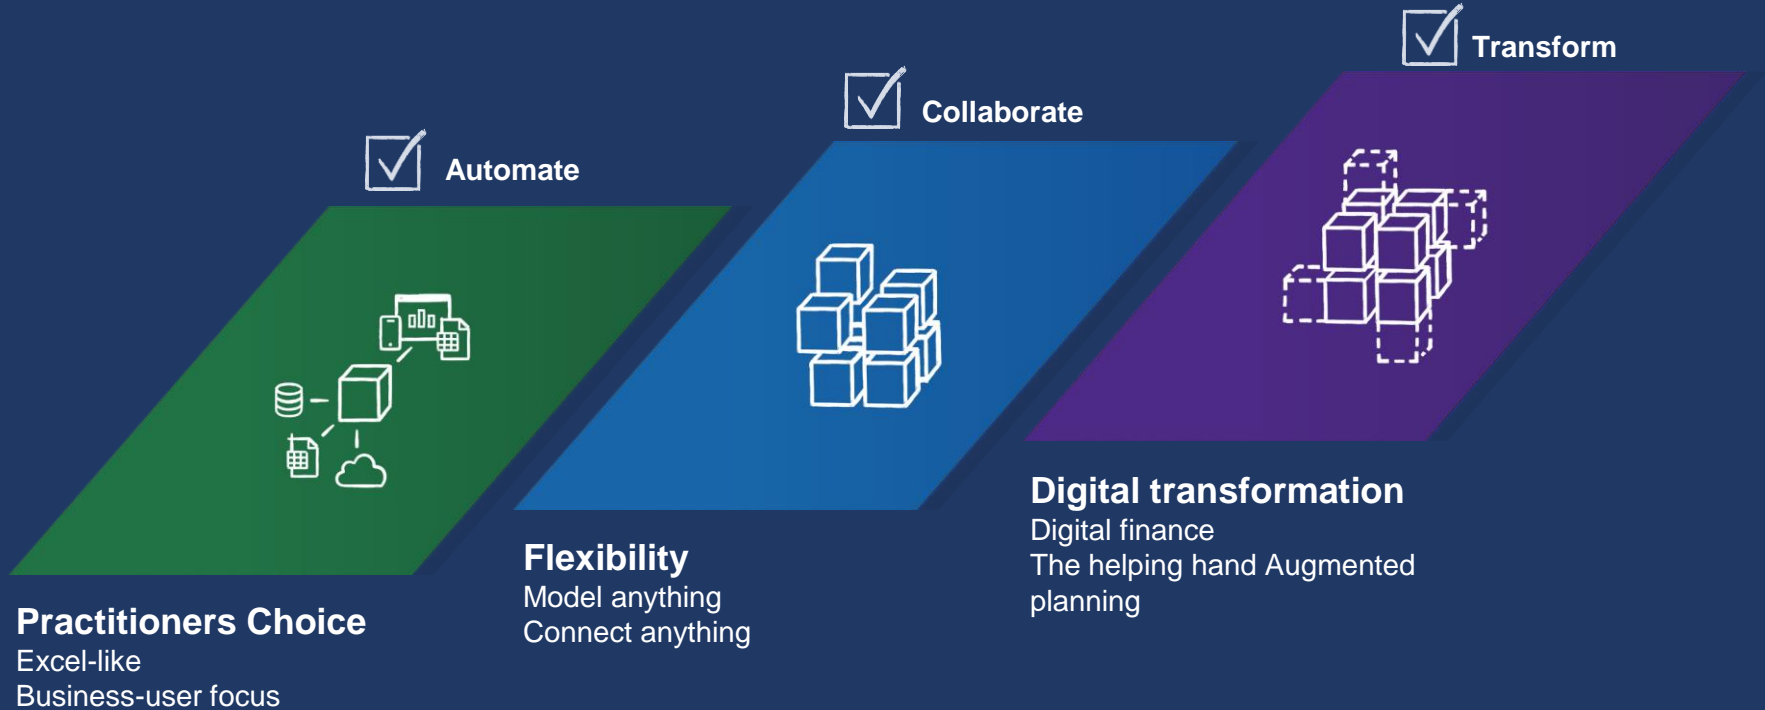

Transform

Utilizing technology to enhance data automation and collaborative processes

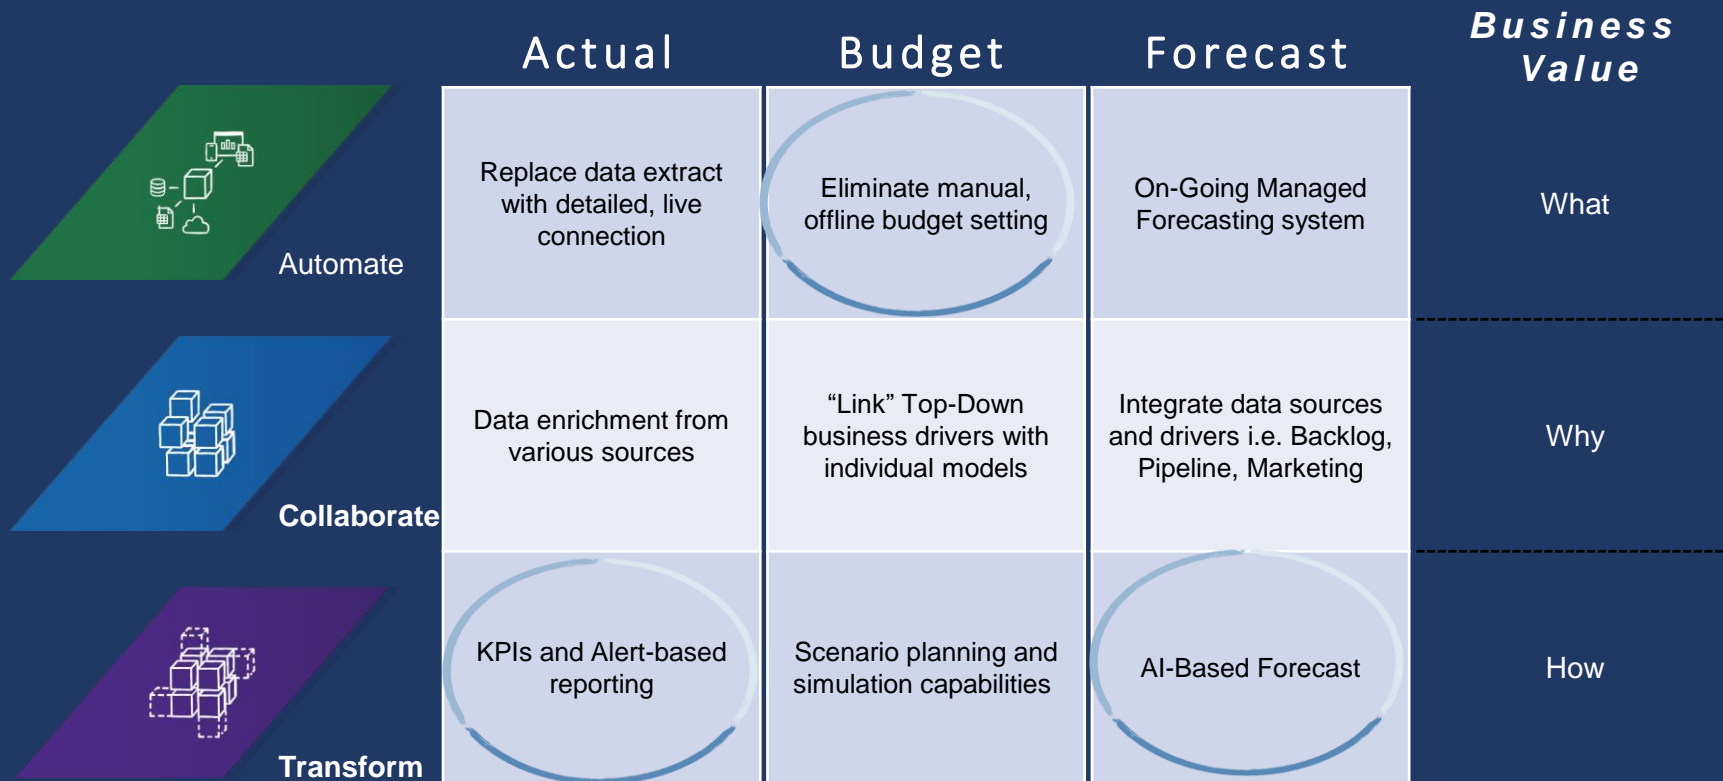

- From Fiscal-Year forecasts to **Rolling** [12] Forecast Budget
- **AI**
 - Time series prediction [*Trends, seasonality, usually high-level*]
 - Drivers & Correlations [*weather → Revenue*]
 - Segmentation [*Customers, Employees*]
 - Data preparation [*Anomaly*]

Supporting the Entire Journey to Financial Transformation

Transformation Journey

Key Takeaways

- Start with a roadmap decision, not a feature(s) selection
- Organization Readiness
- Short and long-term data Maturity
- Focus on improvement and collaboration
